**Abstract of JP11160681**

**PROBLEM TO BE SOLVED:** To provide a liquid crystal display device which is easy-to-assemble and robust, also thin, and has a large effective display area to its surface area.

**SOLUTION:** This liquid crystal display device comprises a liquid crystal panel 1, a lighting means 2 for the liquid crystal panel 1 arranged behind the liquid crystal panel 1, a frame body 3 for supporting the liquid crystal panel 1 and housing the lighting means 2, a scale-board 4 having pawls 5 latching the side face of the frame body 3, and an approximately box-formed metallic frame 6 which covers the periphery of the liquid crystal panel 1 and has an engaging means 7 for engaging the opposite side of the engaging part for engaging the frame body 3 of the pawls 5 of the scale-board 4. The metallic frame 6 is directly engaged with the frame body 3 for fixing on one side face of the liquid crystal display device, and on the side face opposite thereto, it engaged therewith via buffer pawls 5 for fixing.
